Re: Toledo City
Solid Waste

Richard L. Wenzel, M.D.
Health Commissioner
Toledo Health Department
635 North Erie St.
Toledo, Ohio 43624

Dear Dr. Wenzel:

On June 10, 1971, Loren Shaffer, District Sanitarian, Ohio Department of Health, along with Eldon Eckert, Sanitarian from the Toledo City Health Department, inspected the Manhattan "Demolition Dump." This dump was receiving every kind of solid waste material. Some items noted were chicken parts, garbage, various chemicals, sludge, papers and cardboard, wood pallets and crates, car parts, brush, car tires, furniture, appliances and demolition materials. The volume runs about 2000 cu. yards per day. No cover material had been added.

A hearing with Orville Bevel and Kenneth Hensley, operators of the dump, was held June 11, 1971. Mr. Bevel and Mr. Hensley were informed that they were in violation of the Demolition Dump Regulation and the solid waste laws of Ohio. They were ordered to accept only materials listed on the letter dated May 1, 1969, from the Toledo Health Department. Mr. Bevel agreed to cover all waste by June 21. At that time another evaluation of the site will be made and a conference between Orville Bevel, Kenneth Hensley, Toledo City Health Department and the Ohio Department of Health is scheduled.

We would like to proceed in this manner; at the end of 10 days if the site has been covered, an operational procedure plan is to be filled out pending plan submittal and approval. Included in this procedure plan would be site development, daily compaction and covering of waste material and licensing as a conditional solid waste site. If complete compliance is not achieved the license is not to be renewed January 1, 1972. Daily log of operation sheets are to be kept and a progress report made.

Richard L. Wenzel, M.D.

Toledo, Ohio

June 14, 1971

We appreciate the cooperation of your department and we will gladly assist you.

Sincerely,

Loren W. Shaffer
District Sanitarian
